

Acknowledgement of using Generative AI tools

When using Generative AI tools for tasks such as idea generation, data analysis, problem-solving, or receiving significant feedback, it is crucial to acknowledge this use in your assessment.

Follow or adapt the example that is most relevant to your assessment task requirements. If unsure, check your Subject Outline and confirm with your Subject Coordinator.

If required, include examples of prompts and outputs from generative AI or the full-text transcript in an appendix, and refer to this in your acknowledgment statement.

Example 1

This paper was edited using feedback from [generative AI tool/program/ model]. I have critically evaluated and checked any feedback from generative AI.

Example 2

I acknowledge the use of [generative AI tool/program and model] in developing some of my ideas and writing for this assessment. I have critically evaluated any output from generative AI tools. I have included details in the Appendix.

Example 3

I have used reference images from [generative AI tool/program/model] as part of this project.

Example 4

I have used [generative AI tool/program/model] to create fictional case studies that provide the background for Section ___ of the assessment. All other writing and analysis in this assessment is my own.
